

NEW REPAIR & SYSTEM TEST CAPABILITY

Dengensha Decomstar Series

Technical Bulletin

The completion of the Dengensha Decomstar test stand series is a resistive weld control timer, which uses a teach box to program various weld schedules. These types of timers are used in a wide range of applications and are found in automotive assembly plant. The time its self is incased in a cabinet which house a SCR pack that controls the primary weld current.

We test the following in the system:

Model Numbers:

- | | |
|----------|---|
| PB-30E | TEACH BOX |
| SN-30SIA | CONTROL CABINET (WITH OR WITHOUT TIMER) |
| RWC-30RC | TIMER (WITHOUT VALVE CONTROL) |
| RWC-31RC | TIMER (WITH VALVE CONTROL) |

12 Month In-Service Warranty

All Units Are System Tested

No Charge Evaluation
